RANDY WOLF

Columbus, Ohio · +1 415.275.0508 · randy.d.wolf@proton.me · artifexofabrika.com

Lean manufacturing consultant and operations executive. Thirty years taking small and mid-size manufacturers to world class, now installing on-premise AI on the shop floor.

I have run a plant, founded a manufacturer, and built the software that tracks production. I work when the work is worth doing.

CORE COMPETENCIES

Lean Manufacturing & Continuous Improvement · Operational Excellence · ERP Systems & Data-Driven Decision Making · Supply Chain & Inventory Optimization · Quality Management & Process Improvement · Training & Workshop Facilitation · Strategic Planning · Financial Analysis & Cash Flow Optimization · Small Business Consulting · AI-Assisted Tools for Business Intelligence

FOUNDER AND PRINCIPAL · ARTIFEXO FABRIKA · COLUMBUS, OHIO · 2022 TO PRESENT

Lean manufacturing consultancy serving small and mid-size manufacturers in Central Ohio. I assess the operation, install open source AI tools on hardware the client owns, and maintain them. No subscriptions, no cloud dependency, no data leaving the building.

- Built and now deploy two on-premise platforms. **Koorsus** answers questions from a plant's own documents with the source cited, and declines when the answer is not there. **Myarra** tracks production to standard, analyses changeovers by component, and runs PDCA experiments to prove whether a change paid off.
- Designed the deployment model end to end: a consultant prepares a client's appliance before arriving on site, loads master data through ten structured templates, verifies every table, and the plant is running the same day.
- Open source core under GPL v3. Working demo at artifexofabrika.com/demo

SELECTED RESULTS

- **$350,000 to over $8 million in 42 months.** Gallant North America. Customers included Herman Miller, Steelcase, Knoll, and Kimball; nearly $6 million in sales from Herman Miller alone.
- **Supplier reject rate from 86% to under 2%.** Contract manufacturers in China, through a quality assurance methodology I designed and installed.
- **First Time Quality 84% to 95% in 180 days.** Treasury Wine Estates, through Hour by Hour charts and process discipline.
- **Mandatory overtime and a second shift eliminated** while improving quality and reducing returns. The Kingswood Company.
- **72-hour lead time** on made-to-order custom furniture, through a Lean methodology for distributed manufacturing. luxOmat.

EXPERIENCE

The Kingswood Company — Manufacturing Manager · 2022 Streamlined operations to eliminate mandatory overtime and the need for a second shift while improving product quality and reducing returns. Implemented Lean methodologies that raised First Time Quality from 84% to 95% within 180 days. Developed and delivered quality management and process optimisation training for production teams.

luxOmat — Founder · 2016 to 2021 Conceptualised and implemented a Lean methodology for distributed manufacturing, establishing a 72-hour lead time on made-to-order custom furniture. Redesigned production workflows and equipment configuration for flexible, modular production. Designed and built laser cutters, 3D printers, and CNC machines as a deployable equipment suite with a central design library and e-commerce infrastructure. Delivered workshops on Lean principles, value stream mapping, and Kaizen.

Wine Secrets — Equipment Design Consultant · 2015 to 2016 Designed and prototyped production equipment for the wine industry. Short engagement, concurrent with the early development of luxOmat.

Treasury Wine Estates — Lean Manager, Bottling, then Capital Projects · June 2013 to September 2015 Led Lean operations for a regulated beverage bottling environment where lot traceability, shelf life, and recall exposure were operational realities. Held the site operations position during a transition, then moved to a capital projects role responsible for installing new bottling lines. Implemented Hour by Hour charts to tighten communication and reduce downtime.

Gallant North America — Entrepreneur and Business Owner · 2005 to 2011 Acquired a small office furniture manufacturer and grew it from $350,000 to over $8 million in 42 months. Built and led teams, managed budgets, and developed strategic partnerships. Gallant was a test case for Herman Miller's Production System vendor integration, where I learned the HMPS in a high-stakes environment and secured almost $6 million in sales from Herman Miller alone.

Independent Manufacturing Consultant — Shanghai, China and global · 2006 to 2018 Advised Tier 1 and Tier 2 automotive suppliers on operational efficiency, quality control, and supply chain optimisation. Developed a quality assurance methodology that reduced contract supplier reject rates from 86% to under 2% in some cases. Designed and installed continuous thermal moulding equipment in Shanghai and Chengdu for insulation board manufacture. Designed and delivered Lean, strategic planning, and operational excellence training for management teams and production staff. *Engagements were intermittent by design and ran concurrently with other ventures, with the bulk between 2006 and 2011 and occasional work through 2018.*

EDUCATION

International Business Studies, Beijing Language and Culture University Coursework in Additive Manufacturing, MIT
